

STRONGER TOGETHER

One shop can't stop them. **A whole street can.**

The offender who targeted your shop last week is probably doing the rounds of the businesses around you too. Safer Places Network links every local business and police into one shared picture — so when one of you is targeted, all of you know. You don't need to have had a break-in to join — the network only works if everyone's in it, before trouble starts.

- ✓ **Instant heads-up to nearby businesses**
Get alerted when an incident happens close by, before they reach you.
- ✓ **Track repeat offenders across the strip**
Shared, searchable intelligence links the same offender to every shop.
- ✓ **Get footage to police, fast**
Register your cameras so police can find the right footage fast.
- ✓ **Privacy-first & Australian owned**
You stay in control of your cameras. Software only — never monitored.

\$10/mo

Free to join. Add the full picture for \$10 a month — less than two coffees — the plan around 9 in 10 businesses use.
